---

Taiwanese accessory maker Cougar presents the Attack X3-- a mechanical keyboard promising to cover the essentials "purist gamers" demand, namely quality, functionality and durability.

Featuring Cherry MX switches (in Red, Brown, Blue and Black options) in a brushed aluminium design, the keyboard promises tunable polling reaching 1000Hz, 1ms response time and N key rollover capabilities. It offers 10 programmable keys (with on-board memory), on the fly mode switching and dedicated media keys, with Cougar UX software macro handling editing, storage and sharing.

Users also get red LED backlighting and anti-slip rubber feet.

The Cougar Attack X3 hits European retail on December 2015.
