

Pocket VR with CandyShell Grip Combines VR Viewer and Phone Case

Written by Marco Attard
11 February 2016

Accessory maker Speck presents the Pocket VR with CandyShell Grip, a combination of virtual reality viewer and phone case featuring a compact, collapsable design.

The Pocket VR is a Google Cardboard-certified viewer for 3D content, virtual reality and augmented reality experiences. It features a foldable design users can easily store in bags or pockets while protecting the all important lenses.

When in use the viewer clips securely on the CandyShell Grip, a smartphone case promising "military-grade" protection against bumps and drops.

The Pocket VR with CandyShell Grip is compatible with the iPhone 6s/6 and Galaxy S6 smartphones. The package should be available by Q2 2016.
