

Raspberry Pi Gets Kodi Case

Written by Marco Attard
23 June 2016

The company behind the media server software formerly known as XBMC takes on Raspberry Pi accessories with a case for the Raspberry Pi 3, 2 and B+.

A co-creation with case maker Flirc, the Kodi Edition case allows customers to turn the micro-PC into a home theatre PC (HTPC) running, of course, on the Kodi media centre. Construction is in aluminium, and the case acts as a passive heat sink to silently keep the Raspberry Pi's CPU cool.

The Kodi Edition case is available from July 2016 in silver and black.
