

A BookBook for the Latest MacBooks

Written by Marco Attard
10 August 2017

Twelve South announces a version of the BookBook case for all 12-inch MacBook 2016 and MacBook Pro models, providing customers a means to disguise their notebook as a vintage hardback book.

The BookBook case also offers protection, with reinforced corners and a stronger crush-resistant spine. The outside is in premium oil-pull up leather, while the inside is covered in soft microfibre material.

The inside has a hidden compartment for the holding (or hiding) of documents, as well as two elastic bands one can slip over the corner of the MacBook screen. This allows one to open the MacBook screen when they open the BookBook case.

The BookBook is available for other MacBook Pro and MacBook Air models.
