

OWC Intros USB-C Travel Dock

Written by Marco Attard
27 September 2017

OWC launches a smaller USB-C dock option-- the USB-C Travel Dock, a device offering portable connectivity for laptops such as the latest MacBooks through a selection of 5 ports.

The dock connects to PCs or Macs via single USB-C cable. It features x2 USB 3.1 ports, x1 USB-C port (for power), x1 HDMI 2.0 port and x1 SD card reader. The USB-C port provides up to 60W of passthrough charging, and the HDMI 2.0 can handle a 4K display at 30 Hz.

Construction is in brushed aluminium and acrylic.

The USB-C Travel Dock is available now in gold, rose gold, silver and space gray colours.
