---

Corsair presents a gaming headset launched at the owners of just about every games console--the HS35, a Discord-certified stereo gaming headset compatible with PC, Xbox One, PS4, Switch and even mobile devices.

Designed to remain comfortable for long periods, the HS35 features durable lightweight construction with plush memory foam cushioning and adjustable headband and earcups. Inside the earcups are custom-tuned 50mm neodymium drivers with 20Hz-20kHz range and 113dB (+/-3dB) sensitivity and impedance of 32 Ohms @ 1kHz.

The unidirectional noise-canceling boom mic is detachable, and features frequency response of 100Hz-10kHz, -40dB (+/-3dB) sensitivity and 2.2k Ohms impedance. The left ear cup has on-ear volume and mute controls, allowing users to easily adjust audio while playing.

The HS35 is available now in a choice of carbon, green, blue and red colours.
