

iRoom Intros iTop OnWall Docking Station

Written by Alice Marshall
14 April 2020

iRoom announces the iTop OnWall, a universal wall docking station with store-charge-lock and control for all iPad models and sizes, from the iPad Mini up to the 12.9-inch iPad Pro.

The adjustable, sliding charging connector enables a fit for every iPad model, while the locking structure makes the iTop OnWall flexible for the entire family or multiple business users. Designed for simple stand-alone IP control or 3rd party control system integration, the dock has a built-in control processor with a six-button control keypad able to work independently of the tablet. A proximity sensor unlocks the iPad screen and can trigger a control command.

The iTop OnWall offers Lightning or USB-C connection, iPad charging while docked and anti-theft lock protection. Construction is in high-quality aluminium and glass, and the

electronics are Apple-certified, with smart battery management extending battery life. iRoom offers drivers for Crestron, Control4, Svant, RTI and URC, among other control systems. Power and communications come through 110-240 VAC or PoE+ Powered cable.

The dock is available in 10 colour combinations, with the aluminium base in a choice of silver, rose, apricot, gold, black and white, and the glass bezel in black or white.
