### Direct Connection Easier for WiFi Devices

The Wi-Fi Alliance completes a new spec to enable wi-fi devices to connect to one another without joining a traditional network (home, office, or hotspot).

The Wi-Fi Direct spec can be implemented in any wi-fi to make a 1-to-1 connection or 1-to-many. The Wi-Fi Alliance will begin certification in mid-2010 and certified products will be designated **Wi-Fi CERTIFIED Wi-Fi Direct**.
