

26X Profits Rise for Games Group

Written by Bob Snyder
14 October 2008

Games Group, with a third of the UK computer gaming market, reports pre-tax profits rose to £33.4m in the first half, up from £1.3m.

The integration of Gamestation, purchased in UK last year, is going better than expected and could lead to £9m of synergies this year and £14m next year. CEO Lisa Morgan says the group is now pursuing growth overseas (especially Spain, Australia, and France) and in online operations. The company purchased JRC, the biggest group in the Czech games market, for £3.95m in August.
