

## EMEA Printer Market is Up

Written by Bob Snyder  
04 March 2008

---

The combo printer, copier and multifunctional product (MFP) shipments in EMEA in 2007 totaled 52.6-million units, up 4,3% says Gartner.

This year of growth was driven by demand for MFPs, which outsold printers. Colour-page devices grew again in EMEA (up 34%) but monochrome-page was the predominant office choice (up 18% and 85% share of the page market).

HP held Number 1 position while Lexmark lost market-share trying to pull out of the lower end of the market to focus on high-end workgroup space.

"The current period of unit growth may not continue," cautions Gartner.

<b>Vendor</b>	<b>2007</b>	<b>2007</b>	<b>2006</b>
