---

Samsung announces a trio of lower-tier tablets-- the Galaxy Tab4 7.0, 8.0 and 10.1, all featuring WXGA resolution (1200x800) displays, 1.2GHz quad-core CPUs, 1.5GB RAM and 16GB storage (expandable via microSD slot).

Shockingly enough the tablets come in 7-, 8- and 10.1-inch sizes, with designs claiming less weight and thinner bezels than the previous Galaxy Tab 3 series. Also included are 3MP rear-/1.3MP front-facing cameras and LTE Cat4 connectivity.

The OS of choice is Android 4.4 with Samsung additions such as Link (shares content across mobile devices) and WatchON video streaming.

The Galaxy Tab4 lineup hits the market on Q2 2014 in either black or white colour options.
