HP presents the latest generation of Elite x2 notebook-tablet hybrid-- the 1012 G2, a Microsoft Surface Pro rival featuring the usual tablet-plus-keyboard form factor.

The 1012 G2 features a 12.3-inch 2736 x 1824 resolution display complete with Gorilla Glass 4 protection and Active Pen support. Inside the aluminium chassis is a choice of 7th generation Core i3, i5 or i7 CPU (maxing out at the Core i7-7600U), up to 16GB LPDDR3-1866 RAM, up to 1TB SSD storage and a 47 watt-hour battery promising up to 10 hours of use on a single charge (with quick charging powering the battery to 50% capacity in all of 30 minutes).

Connectivity comes through UCB-C with Thunderbolt 3 port, USB-A 3.0 port, microSD reader and a SIM slot for cellular connectivity. Also included are dual-band 802.11ac wifi, Bluetooth 4.2 and various options for connecting to 4G LTE and WiGig networks. Security comes through 5MP front-facing camera with IR for facial recognition and a fingerprint reader.

HP offers a choice of two keyboards-- Advanced (features NFC and Smart Card reader) and Collaboration (with Skype for Business support via dedicated calendar, all end, present and call answer buttons). Both keyboards offer 1.5mm key travel, clickpad and a pen loop for easy stylus storage.

The HP Elite x2 1012 G2 ships from July 2017.
