The Google 2019 hardware lineup includes a more affordable take on the premium Chromebook-- the Pixelbook Go, a slim and light (at less than 1kg) Chrome OS-powered notebook featuring a 13.3-inch touchscreen.

Available in "Just Black" and "Not Pink," the Pixelbook Go carries a range of specifications inside a magnesium casing. Internals include anything from an entry-level Intel Core m3 processor with 8GB RAM and 64GB storage to Core i5 versions with more RAM and storage and a Core i7 version featuring 16GB RAM, 256GB storage and a 4K resolution display.

Providing power to the machine is a battery Google claims offers up to 12 hours of use on a single charge, as well as 2 hours of power after just 20 minutes of charging. In addition, the backlit keyboard promises to be both premium and quiet thanks to Google-made "Hush Keys."
