Your more fashionable customers might want **Pierre Cardin** for their next tablet-- the *haute couture* designer announces the PC-7006 Android tablet.

It runs last year's Android (version 2.2) and comes in a 7" form factor, complete with a Cortex A-8 1GHz processor, 512MB of RAM, 4GB of internal storage (expandable via Micro SD cards) and built-in wifi.

The package comes in a fancy leather case, which makes it look rather good.

Those wanting 3G will need to accessorise though, since it only comes through a separately available dongle.

This is actually Pierre Cardin's second attempt at tablets-- following its 2010 Windows-based effort.
