

4th Gen iPad Gets More Storage

Written by Marco Attard
30 January 2013

Apple doubles the storage of the 4th generation iPad (with Retina Display) from a maximum of 64GB to 128GB, in both wifi and wifi + 3G flavours.

Apple senior VP of marketing Philip Schiller says “with twice the storage capacity and an unparalleled selection of over 300000 native iPad apps, enterprises, educators and artists have even more reasons to use iPad for all their business and personal needs.”

128GB iPads will be available from February 2013.
