---

SpeedUp provides a first look at its tablet offering before launch at COMPUTEX 2013-- the SpeedUp Pad, a 7.85-inch Android 4.2.1 (Jelly Bean) device 7.9mm thick with 300g weight.

The IPS display handles resolutions of up to 1024x768, while technical specifications include a 1.2GHz Snapdragon MTK 8389 quad-core CPU, 1GB RAM, 8GB storage and 5MP rear-/2MP front-facing cameras.

Connectivity comes through 3G (HSPA or EVDO Rev A).

The SpeedUp Pad should be available from August 2013 in select markets, namely Spain, Belgium and Germany.
