ViewSonic announces the VX2460h-LED-- a backlit LED monitor the company says has the thinnest profile (6.8mm) available for its size and class category.

Ideal for enthusiasts and gamers, the VX2460h is a sleek 24" widescreen display using advanced imaging technologies to reduce eye fatigue after extended viewing.

It handles 1080p resolution, with 2ms response time and a 40000000:1 dynamic contrast ratio. Input come through x2 HDMI ports.

For your more environmentally-conscious customers, the VX2460h is mercury-free, Energy Star-certified and has an ECO-mode feature ViewSonic says delivers further energy savings.
