

MSI Debuts New All-in-One PCs at CeBIT

Written by Marco Attard
07 March 2012

MSI launches a range of consumer and professional all-in-one PC models at CeBIT 2012-- the Wind Top AE 1931 and AE 2211 entertainment models, and the AP16 and AP2011 business models.

The Entertainment models feature adjustable touchscreens, in either 19" (AE1931) or 22" (AE2211) sizes. Both carry Intel CPUs and include a "Fun Kit" featuring Smart Media and Smart Link functions, as well as audio and visual entertainment software.

Powering the AE2211 is a 2nd generation Intel Core processor, while the AE1931 uses a more "green" (using 20% less energy according to MSI) Atom processor.

On the business side, the AP16 is a 16" model, while the AP2011 is 20" in size. The AP16 supports fast boot from USB stick (allowing users to quickly switch between operating systems) while the AP 2011 features an adjustable stand and a LCD panel with LED backlighting.
