MSI announces the first All-in-One (AIO) PCs with official Microsoft Windows 8 certification-- the Wind Top AE2281G and the Wind Top AE2081.

Both models carry a 3rd generation Intel Core processor, Nvidia Geforce GT630M graphics card and ship an optional multitouch display. Connections come through two USB 3.0 and four USB 2.0 ports.

The company claims all components are "Military Class," with optimal lifetimes even under heavy conditions.
