Samsung shows off its latest PC offerings ahead of CES 2015-- the ATIV One 7 Curved, reportedly the first All-in-One (AIO) PC with a curved display around, and the ATIV Book 9. the lightest laptop from the company yet.

The ATIV One 7 Curved features a 27-inch 300-nit 1920x1080 resolution LED display, and packs a 2.2GHz Core i5 CPU, 8GB RAM, integrated graphics, 1TB flash storage and a pair of 10W speakers. Windows 8.1 handles OS duties, while media capabilities include Dolby audio and AptX wireless technology.

At CES Samsung also caters for customers wanting the curved monitor but not the PC-- the company launches the ultra-wide SE790C (in 29- and 34-inch sizes), the 32-inch SE590C, the SE510C (24- or 27-inch) and the TV-ready 27-inch TD590C curved monitors.

The final Samsung PC at CES is the ATIV Book 9, a 12.2-inch ultraportable laptop weighing around 950g. It features a 2560x1600 LED display, Broadwell Intel Core M 5Y70 processor, 8GB RAM, 256GB SSD and battery life reaching up to 10.5 hours.
