Asus Republic of Gamers (ROG) launches a followup to the GR8 console-style gaming PC-- the GR6, a miniature PC promising "power and bold styling" within a compact (238 x 245 x 60mm) package.

It carries a Broadwell Intel Core i5 processor, 8GB DDR3L RAM (upgradeable to 16GB), Nvidia GeForce GTX 960M graphics and optional SSD storage (via 2.5-inch storage slot). Asus claims operation is "whisper quiet at 20dB (idle)/28dB (full load).

Connectivity comes through gigabit ethernet LAN, 802.11a/b/g/n/ac wifi and 6 USB, 1 HDMI, 1 S/PDIF optical and 1 DisplayPort ports.

Asus also offers the optional ROG Gladius mouse and M801 keyboard set or the ROG Sica mouse and RA01 keyboard set for a complete system.
