

A Crucial SSD on a Budget

Written by Marco Attard
01 August 2012

Crucial launches a companion range to the m4 SSDs designed for customers on a tighter budget-- the Crucial v4, with pricing starting off from \$50 for a 32GB SSD.

Available in 64, 128 and 256GB configurations, the v4 drives offer read speeds reaching 230MB/s and write speeds of up to 190MB/s for customers with SATA2-capable desktop PCs and laptops.

The Crucial v4 range is available now from select channel partners or directly through the company.
