

Eye-Fi Doubles Storage

Written by Marco Attard
04 October 2012

Wireless-enabled memory card maker Eye-Fi doubles the storage space with the Eye-Fi Pro X2-- a Class 10 SD card with 16GB of storage, double the 8GB of previous offerings from the company.

Like other Eye-Fi cards, the Pro X2 provides the wireless connection of cameras to mobile devices (such as smartphones or tablets). It also connects directly to a wifi network to automatically move content to PCs, the Eye-Fi View cloud storage service or social networks.

An "endless memory" mode automatically frees up space after transfer of photos and videos, while the Pro X2 also allows the wireless transfer of RAW files.
