

Integral Intros USB 3.0 SSD

Written by Marco Attard
20 February 2013

Integral launches the USB 3.0 Portable SSD-- the first external solid state drive (SSD) from the company making use of the USB 3.0 interface.

Around the size of a credit card and weighing just 41g, the drive features read speeds of up to 230 MB/s and write speeds of up to 140 MB/s. Being an SSD, it is shock-proof, silent and more durable than regular portable HDDs.

The USB 3.0 Portable SSD is available in 128, 256 and 512GB sizes and is compatible with both Windows (XP, Vista, Windows 7, Windows 8) and Mac (OSX 10.2.8 and above) PCs.
