SanDisk promises faster storage for you mobile and camera using customers with the Extreme microSDHC and microSDXC UHS-1 memory card portfolio.

According to the company the Extreme cards reach up to 80MB/s read and 50MB/s write speeds, as well as class 10 and UHS speed class 1 (U1) video recording ratings.

The cards are water-, shock- and X-ray proof, and SanDisk offers a download of RescuePro Delux data recovery software in the case of accidentally deleted images. Also included in the package is an adapter for use with full-size SD/SDHC/SDXC memory card slots.

The Extreme microSD card portfolio is available now in capacities ranging from 16 to 64GB.
