

Verbatim's SSD-Based IFA

Written by Marco Attard
31 August 2011

Verbatim will debut its next generation SATA SSD range at IFA 2011, offering an alternative to standard HDDs with high data transfer rates and energy efficiency.

The SSDs offer data read speeds of up to 250 MB/sec and write speeds of up to 180 MB/sec, with 64GB, 128GB and 256GB capacities.

Verbatim's SSD kits include cloning software and an enclosure allowing users to turn their previous HDD into an external drive once removed from their machine.
