

International CES Award for Zagg

Written by Marco Attard
09 December 2010

Zagg becomes an International CES Innovations 2011 design and engineering honoree for its upcoming Zaggmate iPad stand.

At first glance the Zaggmate appears to be a simple aluminium iPad cover. Inside however it has a handy adjustable hinge, turning it into a stand in either portrait or landscape modes.

In addition, the company offers a version with an in-built bluetooth keyboard. It comes with a number of function keys for music control and shortcuts.
