Blu-ray 3D to PCs with CyberLink PowerDVD 10

Written by Bob Snyder
08 September 2010

CyberLink releases PowerDVD 10 ULTRA 3D Mark II to enable Blu-ray 3D movie playback on desktop, notebook and All-in-Ones. It delivers two 1080p frames to create HD3D video effect, and is the first software player to receive a Blu-ray 3D Certification from the Blu-ray Disc Association.

PowerDVD also converts 2D movies and video files into 3D videos.
